

Assignment for UI UX Interns

Design a Teacher Dashboard for an AI-Powered Exam Platform

Objective:

Your goal is to design a user-friendly Teacher Dashboard for an AI-powered exam platform. This dashboard will enable educators to efficiently create, manage, and review exams while leveraging AI for automated grading and student performance insights. The platform should streamline the exam process, offering teachers control over AI-generated scores with options to adjust and finalize them.

Scenario:

A teacher logs into the **SmartExam Platform** to create an online exam, set up an AI-driven grading system, and review student scores before finalizing them.

Login → Create Exam → Add Questions → Set AI Evaluation Mode → Review AI Scores → Approve & Download Results.

Branding:

- Develop a cohesive brand identity for the **SmartExam Platform**, including a logo, and color scheme. The branding should reflect the efficiency, accuracy, and innovation of AI-driven grading while maintaining an approachable and professional aesthetic for educators.

UI/UX Design:

- **A basic design style guide** which includes UI components, buttons, inputs, color, font, Icons & Imagery ensuring a professional, modern aesthetic that aligns with educators' workflows.
- **Dashboard Overview** – Displays upcoming and past exams, grading progress, and key insights.
- **Exam Creation** – Allows teachers to create exams, add descriptions, and set AI grading preferences.
- **Question Management** – Provides an interface to add/edit questions with answer keys.
- **Results Review** – Shows AI-generated scores with teacher override options and student performance insights.

Prioritize a clean, user-friendly interface with intuitive navigation that makes exam management seamless. Try to use auto-layout while designing

Submission Guidelines:

The design must be created in Figma.

Ensure the Figma file is neatly structured with clearly labeled sections:

- Branding – Logo, Brand color palette
- Design Style guide – UI components, buttons, inputs, modals, color, fonts etc
- UI screens

Evaluation Criteria:

Your assignment will be evaluated based on the following criteria:

- Branding: Relevance and creativity in establishing a brand identity for the platform.
- UI/UX Design: Usability of the screen, Contrast, Visual Hierarchy, Typography, Illustrations and Icons, Consistency

Note: This assignment allows room for assumptions when necessary. Focus on showcasing your skills and thought process.
